

JobsPikr provides clean and up-to-date job data from company websites and job boards. It has been developed by, [PromptCloud](#) - a pioneer in Data as a Service with deep domain expertise.

Key Features

- Fully automated
- Fresh data added daily
- Industry and geography wise segmentation of sites
- Data delivery available via both direct download and REST API

As extracting data from the web still remains a huge bottleneck, JobsPikr helps bridge the gap between job data and companies looking to make use of it. JobsPikr is a job data delivery platform that provides job feeds by extracting data from the career pages of company websites and job boards across the globe.

With JobsPikr, you are only a few clicks away from job listings posted on hundreds of company websites and job boards every day. JobsPikr runs automated crawls on websites from different parts of the world to bring this data together at one place. All you have to do is select the sites from the industries and geographies that you want the data from, make the payment, and access it. The data format provided by JobsPikr is compatible with databases.

Who is it for?

- Job boards
- Research and analytics firms
- Staffing agencies

Fuel your Job Board

Job Boards need a constant supply of job data, but extracting this data from the web comes with its own challenges. JobsPikr solves this problem by providing you with ready to use job data that can be plugged to your Job Board site to enrich it with job listings.

Generate Insights

If you are working on a research that involves identifying trends in the labor market, changes in skills, experiences etc., the job data feed from JobsPikr can be used to power it. Clean and structured data delivery ensures that it can be easily consumed by data analytics systems.

Generate demand for staffing agencies

HR consultancy firms should stay updated with the companies that are hiring and have instant access to all their job listings. With JobsPikr, you can subscribe to the job data feeds in your desired geolocation and double your lead generation by identifying opportunities. Use the job data feed to provide customized list of opportunities to your candidates.

How it works

1. Pik Sites

Select the sites from different industries and geographies that you would like to subscribe to.

2. Review

Review your current selection and the pricing breakdown.

3. Subscribe

It's free for up to 10 websites including 1 job board. For instance, you may choose any 9 company websites and 1 job board. To acquire job feeds from more sites or job boards, enter your billing address and the credit card details to complete your subscription. Once done, you will be redirected to your Account Dashboard where you can download the data daily.

Key Benefits

- Reduces time to acquire job data
- Saves infrastructure cost via cloud services
- Saves resources involved in the data extraction process
- Minimizes the total cost of ownership

Salient Points

- JobsPikr runs on AutoExtract, PromptCloud's proprietary machine learning technique for AI-based web data extraction.
- Comes with a forever free plan, which is valid up to 10 sites including 1 job board. No need to add card details. [Sign up now.](#)

API Details

Apart from directly downloading the data, you can also get the data by querying the JobsPikr API. The API details and instructions on using it can be found by going to the 'API Details' tab in the left sidebar.

API Details

Home / API Details

API Endpoint Backup API Server API Usage Query Parameters Data Format Selection Server Responses

API Endpoint

http://api.janet.com/data?id=promptp_jp_7022231ea6cb&client_auth_key=OS512n9-zprh0XngfcncC cub8dGsJdcxz91kQBAyhrofLekra71FM90

Backup API server

You can access our second high availability server(bcp server). This is the corresponding bcp server url for the above link for example.

http://api.janet.com/data?id=promptp_jsap_702223116cb&client_auth_key=O2n9-zprh0Xngfcnc341Ccub8dGsJdcxz91kQBAyhrofLekra71FM90

We encourage our clients to use <http://api.promptcloud.com> and fallback to bcp server temporarily in case of unavailability of <http://api.promptcloud.com>.

Site Suggestion

If you couldn't find sites you were looking for in the Site Picker Wizard, you can always suggest them to us by using the 'Sites Suggestion' option in the left pane.

Sites Suggestion

Please provide your suggestions in case you wish to add more sites. We shall review it and add them to the pool along with the next version of JobsPikr.
